个人介绍 关于我

厦门大学马来西亚分校

计算机科学学院 数字媒体技术

CGPA: 3.18/4.0 (专业top 30%)

主修课程: 游戏设计, 计算机动画, C/C++编程, 计算机图像, 计算机架构, 操作系统, 数据库, 数据结构等

荣誉/奖项: 厦门大学学生奖学金, 上海无界初创大赛决赛奖

朱果
20岁

个人技能

视觉设计

熟练使用Procreate等平面绘画工具，PS等视觉设计软件

办公软件

熟练掌握Word，PowerPoint，WPS等办公软件

剪辑软件

熟练运用Premiere Pro，剪映等剪辑软件

交互设计

熟练使用Figma, 即时设计等交互设计软件

基本代码逻辑思维

基本理解和使用C/C++

动画制作

熟练使用Adobe Animate动画制作

桌游“ESCAPE FROM THE PYRAMID OF HORUS”

中文名：《逃离荷鲁斯金字塔》

合作策略型桌游，需要5个人参与游戏

4名玩家，1名主持人

游戏梗概

几个世纪以来，荷鲁斯金字塔一直隐藏在不断变化的埃及沙滩之下，无人问津，直到阿布拉瓦什石灰岩高原的一次考察探险发现了它。这座金字塔充满了与它接壤的尼罗河三角洲一样丰富的宝藏，是一座灯塔，召唤着一群渴望将他们的手放在其中的无价考古文物上的杰出冒险家。但随着无数的危险等待着，一旦你进入金字塔，你可能永远不会出来。

四位冒险家为了宝藏进入了这个危险重重的金字塔，拿到宝藏的同时也触发了金字塔的自毁机制，时间急迫，他们必须在有限时间内，通过互相协作，解决一个个谜题，打败守卫者，拿到钥匙，活着带出宝藏，逃离荷鲁斯金字塔。

桌游说明书

“当你拿起这份手册
想必早已听闻荷鲁斯金字塔的大名”

“神秘的坑洞，古老的诅咒，恐怖的守卫…
让所有冒险家心动的宝藏就埋藏在重重危险下！”

《金字塔冒险手册》

“而我的朋友，你很幸运
因为这份手册将会在你冒险的过程中帮上大忙
听我说的，保你小命！”

--- 开始紧张刺激的金字塔冒险吧 ---

1- 选择适合的角色，是一场冒险华丽的开端

你将和其他三位冒险家一起
运用各自的角色技能
共同面对难题
合作取得钥匙，到达终点

探险家

当掷出骰子的点数 ≤ 4 时
可以多掷一次骰子
(两次掷出点数相加为最终体力)

法师

3回合后
每回合可主动改变一次场上任一路卡的方向
(需在自己的回合使用)

骑士

可以免疫并破坏怪物陷阱
奇数回合可主动使用一次“破坏路卡/路障”技能

牧师

当牧师和队友处于同一格时
可治愈队友的重伤或诅咒
偶数回合可主动使用“移影换影”技能

科学家

游戏主持人，不属于玩家
负责提示当前回合，管理体力兑换
当玩家遇到事件时，按自己的意愿分配事件

2- 绝密的地图，帮助你顺利抵达终点

终点

起点

钥匙1

钥匙2

四名玩家自行分为两队，从两个起点出发
需要拿到两个钥匙
且四个人都到达终点

为了更快达成目标
你们可以尝试一些策略，例如
兵分两队 / 多人集中铺路 / 尖兵策略
留给你们自己合作探索吧！

路障

分布在地图的某些格子中
可以由骑士破坏
也可以通过道具卡破坏（后文详细解释）

事件

分布在地图的某些格子中
玩家将路卡铺在其上
并且站在其上（包含途径）
则会触发某种事件（后文详细解释）
方形事件卡在触发后仍将持续存在

起点，终点和钥匙格子（共五个）
不需要铺路即可站在上面

《金字塔冒险手册》

4. 陷阱类事件卡

☐怪物守卫者
将角色变成重伤状态，并且怪物陷阱会一直在地图上存在（当骑士相距怪物陷阱一格即可破坏它）
重伤后，角色不能再掷骰子，可以使用道具卡
可以被牧师治愈

☐坑洞
角色掉入坑洞，三回合不能掷骰子
可以使用道具卡和角色技能
当队友到达其所在的相邻格子（距离一格内）后可将其救出

☐诅咒
触发后，角色下一回合将无法使用技能与道具卡
可以被牧师解除

怪物守卫者

坑洞

诅咒

5. 小游戏类事件卡

☐猜点数
参考“心灵骗手”，若成功，则四位角色每人挑选一张道具卡
触发该事件的人挑选一人进行游戏
两人分别从1-10的扑克牌里面抽两张，然后按顺序打出
如果顺序打出的数字是递增的，就获胜

☐猜拳
触发事件的人与其他三人分别猜拳，赢了几人就抽取几张道具卡

☐金字塔心脏病
参考“他回心脏病”，胜者可以挑一张路卡
从触发人开始，四人特殊轮流从路卡袋子里摸一张路卡并放在桌上
当桌上出现三张相同路卡的一刻
最先反应过来并且拍到桌子指定物品的人获胜

猜点数

猜拳

金字塔心脏病

3- 准备工作的关键，了解生存法则

1. 体力

在回合开始掷出骰子的点数为本回合体力
（手中每张道具卡可以兑换2点体力，每回合可选择兑换一次）

2. 路卡与移动

消耗体力，将路卡以任一方向铺在角色周围某一格
玩家可沿着路卡移动，移动1格消耗1体力
注意！有些路在中间，有些路靠近边缘，如下图：

3. 道具卡

☐道路转向
选择局上一张路卡，随意改变方向

☐移形换影
选择一位队友，移动到他所在的格子（也可以让队友移动到自己所在的格子）

☐地形破坏
破坏一张路卡/路障
（只对四周一格的路卡/路障有效）

☐再来一次
多掷一次骰子
（回合开始掷骰子时使用）

☐位置互换
与一名角色交换位置。
（需对方同意）

☐豪饮之瓶
立即抽一张路卡

和队友决定行动顺序
依次开启回合，主动结束回合
每回合开始，通过掷骰子获得体力

先得到地图左右的钥匙
然后四为冒险家全部到达出口
则获得胜利

那么便开始你的冒险吧，冒险家，祝你好运！

动画短片 《无翼鸟》 A BIRD WITH NO WINGS

逐帧动画

由ADOBE ANIMATE制作

总时长：1分01秒

小组作业

主题：绝症男孩在离世前为了飞行的梦想，坠楼，最终变成了无翼鸟飞翔在天空

前期准备

PRE- PRODUCTION

Idea and Research

03

"KIWI"
BY DONY PERMEDI

“Without a wing, but I dream of flying.”

Storyline

04

1

The boy was seriously ill and woke up in the hospital room

2

The boy turned his head, saw the bird outside the window, and dreamed of flying by himself

3

The boy heard what his parents and doctors said, and knew he would not live long

4

The boy was very sad and longed for freedom, so he chose to jump out of the window

Storyline

05

5

The boy grew wings on the way down and flew with the bird

6

The boy saw the happy scene of himself eating with his family

7

The boy saw himself became an astronaut and ascended to the sky in a rocket

8

The boy finally turned into a bird and flew away

角色设计

动画制作

逐帧动画

技术使用包含了传统补间，动作补间等补间技术
包含制作播放交互操作，如播放按钮等

动画短片 《灯笼山》 LANTERN MOUNTAIN

逐帧动画

由ADOBE ANIMATE制作

总时长：2分18秒

小组作业

主题：一对青梅竹马长大后因为梦想分道扬镳，最后相聚在灯笼山，再次见面。感人的爱情和励志故事。

“众里寻他千百度，蓦然回首，那人却在灯
火阑珊处。”

"I look for her in vain.
When all at once I turn my head,
I find her there where lantern light is
dimly shed."

—《青玉案·元宵》

Storylines

1

One boy and one girl are
childhood sweethearts.
They grew up in a small
village in the valley.

Introduction

Let's Recycle! is a mobile app for garbage collection and recycling knowledge. It offers a comprehensive guide for proper disposal of various types of waste. Our target audience includes individuals of all ages concerned about environmental protection, as well as organizations and businesses involved in recycling.

Prototype

Learnability: Synthesizability

The obvious switching of the shape of the icon allows the user to clearly see the result of the action.

Figure 1

Learnability: Predictability

The number is framed to represent being selected so that users can determine available actions. (Figure 2)

Learnability: Familiarity

Users can perceive system in terms which they are familiar. (Figure 3)

Figure 2

Figure 3

Let's Recycle

Flexibility: Substitutivity

Many alternative ways for specifying input. (Figure 5)

Learnability: Consistency

Users can always find the back button in the upper left corner. (Figure 4)

Figure 4

Figure 5

Flexibility: Customizability

Customized caring mode for people in need. (Figure 6)

Robustness: Observability

Users can determine internal state of delivering from screen. (Figure 7)

Figure 6

Figure 7

Method

The evaluation study aims to improve app usability and promote recycling behaviors. For the evaluation study, we use a mixed-methods approach combining quantitative and qualitative data, using a mid-fidelity prototype of the 'Let's Recycle' app. Features include a waste sorting guide, door-to-door recycling, and progress tracking. Participants aged 19 to 22, with different recycling and mobile tech familiarity, are required to perform tasks representing app features.

Results and Discussion

According to Borsci, SUS scores range from A+ to F, reflecting good to bad (Lewis & Sauro, 2009). Our system achieved a score of 80.667, equivalent to level A, indicating a positive outcome. Q4 received an average score of 1.73, and Q10 scored 1.4333, both assessing system learnability and receiving positive feedback (Borsci et al., 2015).

Except for Q2 and Q5, the other eight usability assessment questions yielded positive results. Q2 scored an average of 2.2333, reflecting a complex user interface that hampers usability. Participants also mentioned excessive pop-ups. Additionally, Q5 scored below 4, indicating inadequate categorization and integration of system functions.

Regarding question 3, respondents answering 'yes' had higher scores, suggesting greater satisfaction among users with recycling experience. To accommodate new users, software usability and learnability should be improved. Alternatively, for those without recycling experience, a detailed and customizable module guiding users through recycling is recommended, as participants suggested, "I think there should be teaching you how to do the category of recycle."

Males scored higher on average than females This discrepancy may stem from higher UI design expectations among females. Thus, improving UI consistency and reducing complexity is crucial.
